

Form 4: Direct Messages Between Your Child and Their Mentor

DRAFT FOR ATTORNEY REVIEW. NOT A FINAL FORM. NOT LEGAL ADVICE. Document ID: CL-CONSENT-04 · Version 2026.03 (draft) · Governing law: Ohio and applicable federal law **Elevated form.** Requires strong identity verification (Form 00 section 2). Never required to take part in the program. Incorporates Form 00 by reference.

Read this first. This form is about letting your child exchange direct messages with their assigned Mentor inside the Platform. We built this feature so a message between an adult and your child is never truly private: you and a designated Safety Officer can read every message, and neither your child nor the Mentor can delete anything. We designed it that way on purpose, because it is safer. You never have to allow this. Your child can take part fully without it, using group channels and project comments instead.

1. How the feature works

Before deciding, understand what this feature does and does not do:

- Your child may message only their assigned Mentor, and only during set hours. Messaging is closed overnight.
- Every message is saved permanently. No one, including the Mentor, can delete or edit messages.
- You may read the full conversation at any time. So may the Safety Officer.
- Mentors may not move the conversation to a personal phone, email, or outside app. Attempts to share outside contact information are flagged.
- Messages are reviewed for safety. If a CurioLab adult sees a reasonable sign of harm, they may be legally required to report it, and this feature cannot be used to keep such a concern secret.
- This feature is for coding help and program logistics, not private personal conversation.

2. What you would be allowing

- ☐ I allow my child to use direct messaging with their assigned Mentor, on the terms above.
- ☐ I understand and accept that these messages are kept until my child turns thirty and are not covered by an ordinary "delete my data" request. This longer keeping period exists because certain claims may be brought many years later. It applies only if you allow messaging.

3. Withdrawing this permission

- ☐ I understand I may withdraw this permission at any time.

Withdrawal turns the feature off going forward. It does not delete messages already sent, because CurioLab is required to preserve them as described above.

4. Signature

My signature confirms only the items I checked above. Anything left blank is something I chose not to allow. This permission is not required for my child to take part in CurioLab.

Guardian signature: _____ **Relationship to child:** _____ **Date:** _____

Identity confirmation (CurioLab completes): [] signed form returned [] card confirmation [] video confirmation [] other counsel-approved method

Annex (for CurioLab / counsel)

- **Grants:** `mentor\_dm` (feature enable, revocable prospectively) and `mentor\_dm\_retention` (acknowledgment). Revocation must not delete the preservation set.
- **Verification:** strong VPC for under-sixteen; capture by signed form given this is the highest-sensitivity grant (adult made contactable to minor).
- **Retention:** to age thirty (18 + 12) per R.C. 2305.111, litigation-hold override. Explicit carve-out from deletion policy, disclosed in section 2.
- **Feature predicate:** active pod assignment plus current Mentor eligibility (background check, training, code of conduct), re-checked at every send and read. Consent alone does not enable the feature.
- **Prohibited:** any waiver of mandatory reporting; vague "we may monitor everything" language without naming who and how.
- **Authorities:** COPPA Rule; R.C. 2305.111; R.C. 2151.421.
